ITC Ltd (ITC)

Eliminating 'Tax on Tax'...

With the clarity emerging on new indirect tax rates on cigarettes, we believe net tax incidence on ITC would come down by 4.5% mainly due to elimination of cascading effect of taxes. Considering anti profiteering clause in place cigarettes prices are likely to come down by 2.5%. After five consecutive year of increase in duties & taxes on cigarettes, GST implementation has come as advantage for cigarettes companies. We believe the company would continue to concentrate on low priced (64 & 69 mm) cigarettes to derive higher volume growth. Notably 64 mm category volume contribution has increased from ~20% to ~32% in last one year. We have built in 4% volume growth for the FY18E and 5% price hikes as the company has increased prices earlier this year to the tune of 11-14% on above 69 mm portfolio. We remain positive on the stock and raise our target price to ₹ 407 per share.

Excise on cigarettes scrapped, NCCD to continue

Before the implementation of GST the cigarette industry attracted VAT (at 25%), basic and additional excise duty and NCCD. Under new tax structure excise duty & Additional Excise Duty (AED) is abolished whereas National Calamity Contingent Duty (NCCD) would continue to be levied on cigarettes. Ad valorem VAT is replaced by the GST rate of 28% and excise duty is replaced by GST compensation cess of 5% plus specific duty as per the cigarette size. Though, we believe that the tax rate has remained similar but the cascading effect of tax structure will be eliminated under GST. We believe that this may result in 4.5% reduction in the overall tax incidence and also a window for the company to reduce the prices by ~2.5%, which may be a volume driver.

Rise in taxes for beedi may be an additional driver

The high incidence of taxation on cigarettes in India have over the years have led to diversion of consumption of tobacco to lightly taxed or tax-evaded tobacco products like beedis, chewing tobacco, guthka and illegal cigarettes. The legal cigarettes account only for 11% of the total tobacco industry contributing 87% of the tax revenue from the sector. However, we believe that the imposition of 18% GST on beedi leaves and 28% on beedi sector would be negative for the beedi industry as the expected tax incidence was lower at 18% against VAT incidence of 20%. We believe that any price hike taken in beedis in order to pass on the additional tax incidence might lead to a gradual shift in consumers towards consumption of low priced cigarettes. In addition, this will bring down the tax evasion from the beedi players as they would have to come under the taxation regime in order to get the benefit of the input tax credit. Further, this may provide the organised players an opportunity to launch cigarettes at lower price points, providing a push to the overall organised cigarette market.

Lower tax incidence to boost volumes, maintain Buy

We are factoring in 4.0% volume CAGR and 7.5% realisation CAGR in FY17-19E for the cigarette business. Additionally, ITC's focus on growing its FMCG business (estimated to grow at a 12.3% CAGR over FY17-19E) by entering newer segments and tapping opportunity in foods segment would be a catalyst for topline growth in the long run. We reiterate our BUY recommendation on the stock with a target price of ₹ 407 valuing it on SOTP basis. We have valued the cigarettes business at ₹ 334 (higher multiple of 35x FY19E EPS given the lower tax incidence), FMCG at ₹ 44 (4x MCap/sales FY19E), paperboards at ₹ 5 (3x FY19E EV/EBITDA), agri-business at ₹ 5 (3x P/BV FY19E) and hotels at ₹ 7 (2x EV/room FY19E) and also added the cash per share of ₹ 12.

RATING RATIONALE

ICICIdirect.com endeavours to provide objective opinions and recommendations. ICICIdirect.com assigns ratings to its stocks according to their notional target price vs. current market price and then categorises them as Strong Buy, Buy, Hold and Sell. The performance horizon is two years unless specified and the notional target price is defined as the analysts' valuation for a stock.

Strong Buy: > 15%/20% for large caps/midcaps, respectively, with high conviction;

Buy: > 10%/15% for large caps/midcaps, respectively;

Hold: Up to +/-10%;

Sell: -10% or more;
